

Ms. Scarlet sells phone cases. She buys them in bulk online then sets up a stand at the mall and sells them to teenagers who will break their phone. She buys them for \$1.50 each and marks them up 600% because she knows that the kids will overpay for them. How much does she sell them for?

La Sra. Scarlet vende fundas para teléfonos. Los compra al por mayor en línea, luego instala un puesto en el centro comercial y los vende a adolescentes que romperán su teléfono. Los compra por \$1,50 cada uno y les aumenta el 600% porque sabe que los niños pagarán de más por ellos. ¿A cuánto los vende?
